 Tinton Falls, NJ 07753

Dear Dr. Chunn:

According to a 2003 survey of women of all ages\*, 17% of the respondents did not visit their gynecologists annually and 28% did not go in for their yearly Pap test.

What's more, many of the women felt that an annual gynecological exam was not necessary once they hit menopause.

The reality is that a woman's gynecological health is *just as important whether she's going through adolescence, pregnancy, is pre-menopausal or in menopause.*

At Monmouth County Associates, our team of female and male physicians offers a full range of obstetric and gynecological care for every age and stage of life. Our services range from adolescent care and counseling to menopause, normal to high-risk pregnancy, and sexual health exams to cancer screenings.

Our affiliation with Jersey Shore University Medical Center gives us the opportunity to provide comprehensive care in collaboration with gynecological oncologists and other medical specialists should they be needed.

We hope that you will encourage your female patients to visit their gynecologists annually. And, in the event that they are looking for a new gynecologist, we welcome new patients to our practice at all three of our conveniently located offices in Neptune, Howell and Wall Township.

If you have any questions, please don't hesitate to call me at **732-775-8789**.

Sincerely,

Kathleen S. Walsh, M.D.
